## ABOUT ME

I'm Safa. I'm an Android Developer.
I've been developing many projects with .net since 2010 and I have been developing mobile applications for the last three years.
I have developed many apps with Android Studio(Java, Kotlin) and Flutter.
You can see detailed information about my projects in the projects section.
I'm looking for a job where I can improve myself.

**Address** Konya, Turkey | **Website** https://www.selcuk.edu.tr/Birim/doganhisar_myo

## LANGUAGE SKILLS

**MOTHER TONGUE(S):** Turkish

**Other language(s):**

**English**

| Listening | Reading | Spoken production | Spoken interaction | Writing |
|---|---|---|---|---|
| A2 | B1 | A1 | A1 | B1 |

## DIGITAL SKILLS

Social Media | Flutter Dart | Android Development (Kotlin, Java) | GitHub / Gitlab Firebase | Databases used: SQL, MySQL, Firebase Realtime Database

## WORK EXPERIENCE

**25/07/2022 – CURRENT** Ankara, Turkey

**Mobile developer** Kamutech Yazılım

I am currently working as a mobile developer on Kamutech Yazılım. I am coding applications with Flutter and publish them on both iOS and Android platforms, I do the store settings and SAO optimization and then post it. These applications are Bordro Takibi, Kvkk sms application, PDKS, and ISG. I keep the app updated according to the feedback.

## ADDITIONAL INFORMATION

**Projects**

**05/02/2021 – 05/08/2021**

**Kalori Sayar** In this application, I developed Kalori Sayar with Android Studio(Java) and I used all Jetpack components while I've developing this app such as Room, Firebase, Dependency Injection and Navigation. Also, My project include MVVM design pattern. As of today, my app has

reached 20,000 downloads. I'm still developing and fixing my project with feedback from users.

**10/08/2021 – 20/08/2021**

**Baby Sleeping Sounds** This application I made as a freelancer. It contains baby sleeping sounds. I made this app because of learning and experiencing the Google Play platform. In-app advertising strategies and app publishing that I have made and published to see the procedures is the first application.

**25/07/2022 – 01/11/2022**

**İşçi e-Bordro** In this application, I developed İşçi e-Bordro. In this application I used many powerful libraries from pub.dev. For storage: Hive and SharedPreferences. For State Management: mobx and bloc. For network layer; dio and vexana. For graphics I used the syncfusion library. It is provided with the API provided in the application. I managed this incoming data using network layers and coded the interfaces. As of today, my app has reached 200,000 downloads. App is currently live on both iOS and Android platforms.

**05/11/2022 – CURRENT**

**Kvkk Sms** In this application, I use exactly the same technologies that İşçi e-bordro. I use the common architecture that I have created for myself and apply it to the projects I develop. This application is generally written for transmitting documents related to KVKK to users via sms and getting them approved. The development of the application is still ongoing.
